"Cloning, sequencing and localization to chromosome 11 of a cDNA encoding a human opioid-binding cell adhesion molecule (OBCAM).";

Gene 155:213-217(195).

-! FUNCTION: Binds opioids in the presence of acidic lipids; probably involved in cell contact.

-: SUBCELLUIAR LOCATION: Attached to the membrane by a GPI-anchor (By

J. Neurosci. 16:1770-1779(1996).

Eventation of the may represent a receptor or a subunit of a receptor complex.

L. SUBCELLULAR LOCATION: Attached to the membrane by a GPI-anchor.

EVENTE-Alternative splicing; Named isoforms=2;

Name=1: Synonyms=Malor;

Isold=090773-1; Sequence=Displayed;

Name=2: Synonyms=Malor;

Isold=090773-2; Sequence=VSP 002607;

Isold=090773-2; Sequence=VSP 002607;

C.I. TISSUE SPECIFICITY: Found on the dendrites, somata and axons of developing Purkinje cells. Undetectable on other neurons like

C.I. DEVELOPMENTAL STAGE: Expressed by developing cerebellar Purkinje cells.

C.I. DEVELOPMENTAL STAGE: Expressed by developing cerebellar Purkinje cells.

C.I. SEXPESSED CON (from E1S. Until E22.). Expressed in the adult.

C.I. STMILARITY: Belongs to the immunoglobulin superfamily. IgLON

A;Title: Primary structure and developmental expression of a large cytoplasmic domain fo A;Reference number: 809600; MUID:90098871; PMID:2481269

A;Accession: 809600

A;Molecule type: mRNA

A;Redeatues: 1-1088 «KRI>
A;Rotession: 809600

A;Note: the authors translated the codon AAA for residue 970 as Leu

C;Comment: NCAM mediates cell-cell adhesion via homophilic binding with another NCAM mol

C;Comment: Several forms of NCAM are produced by alternative splicing.

neural cell adhesion molecule long domain form precursor - African clawed finely ablternate names: NCAM-180
N;Contains: neural cell adhesion molecule, short domain form (NCAM-140)
C;Species: Xenopus laevis (African clawed frog)
C;Date: 31-Mar;1993 #sequence\_revision 31-Mar-1993 #text\_change 09-Jul-2004

us-09-978-544a-523.rpr

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              RESULT 3
JC4025
optioid-binding cell adhesion protein - human
C;Species: Homo sapiens (man)
C;Date: 13-Jun-1995 #sequence_revision 14-Jul-1995 #text_change 09-Jul-2004
R;Shark, K.B.; Lee, N.M.
Gene 155, 213-317, 1995
A;Title: Cloning, sequencing and localization to chromosome 11 of a cDNA encoding a huma
A;Recentere number: JC4025; MUID:95237612; PMID:7721093
A;Accession: JC4025
A;Molecule type: mRNA
A;Residues: 1-345 *cMAA
A;Residues: 1-345 *cMAA
A;Residues: UNIPROT:014982; GB:L34774; NID:9514373; PIDN:AAA36387.1; PID:9514374
A;Resperimental source: brain
C;Comment: This protein binds opioid alkaloids in the presence of acidic lipids, exhibit
C;Generics:
